## Anilox Cleaners

### **AVFMAC AV Anilox Cleaner**

Premium cleaner that is ready to use and designed to clean water-based, UV and solvent inks in automated cleaning systems like a Flexo Wash W-200. Cut 50/50 with water. This highly alkaline anilox roll cleaner should not be used where soft metals are present or on photopolymer material.

### **AVFCECO AV ECO-40 Anilox Cleaner**

Our standard anilox cleaner designed to clean water-based, UV and solvent based inks in an automatic cleaning system like the Flexo Wash FW-40, Cut 50/50 with water. Better health rating (2 vs. 3) compared to Falls MAC and has 3% less VOC's. This highly alkaline anilox roll cleaner should not be used where soft metals are present or on photopolymer material.

### **F12MAC AV #12 Machine Anilox Cleaner**

Designed to clean water-based, UV and solvent based inks in an automated cleaning system like the Flexo Wash with a low 10 PH.

### **X-CELLSUV VAV X-Cell SUV Aqua Cleaner**

A solvent based cleaner that can be ran in an automated cleaning system with no potassium or hydroxides. It will also clean water-based, UV and solvent based inks.

### **AVFCAKSOLV5 Ovit Aniloxmatic Cleaner**

AVFCAKSOLV5 is designed to clean water-based, UV and solvent based inks in an Ovit Aniloxmatic machine.

### **AVANIGEL320Z AV Ani-Gel**

A gel HAND cleaner that clean water-based, UV and solvent based inks. Place a small amount of Ani-Gel on the roll and let it sit up to 5 minutes depending on condition of the roll. Work into the roll with a press brush if needed and then clean with water. Do not let it dry on the roll.

## Pretreatment Solutions

### **AVFCPW or AVACPW Pre Wash**

Specifically formulated to remove hard to clean UV and solvent based inks prior to putting anilox rolls or parts into any automated cleaning machine. Spray on anilox or wipe on with a rag. It will take ink off instantly. Always take a wet rag with water and wipe cleaner off before re-inking. Use to wipe off ink before putting anilox in a cleaning machine.

## Plate Cleaners

### **FCUVSOLV AV UV Solvent Cleaner**

This is an all-around cleaner. Very low swell to plates if any. Can also be used in a spray bottle to clean by hand or in a plate cleaner. Cleans water-based, UV and solvent based inks.

### **AVSOLVWASH**

A solvent based cleaner that can be used in a spray bottle to clean by hand or in a plate cleaner. Cleans water-based, UV and solvent based inks.

### **AVPW20-200 or AVACPW20-200 Plate Cleaner**

A solvent based cleaner that can be ran in an Ovit or Flexowash plate cleaner to clean water-based, UV and solvent inks.

## Parts Washers

### **AVFPWC AV Power Wash Concentrate**

A solvent based cleaner that has a littler higher PH so it can be mixed and still have the power to remove water-based and UV inks. Dilute 1-part cleaner to 5 parts water or use straight depending on what you are cleaning. Use in a spray bottle to use as a general shop cleaner and press side cleaner.

### **AVFPWE AV Power Wash Extra**

A solvent based cleaner used to clean water-based, UV and solvent based inks and coatings. Can be diluted up to 10 to 1. Works well in a parts washer application, hand parts washer if used straight or press side cleaner.

### **AVFPWU AV Power Wash Ultra**

A solvent based cleaner used to clean water-based, UV and solvent based inks on the press. It is used in the same manner as the Falls Power Wash Extra but lower VOC and less smell. Can work well as a hand parts washer if used straight or press side cleaner.

### **AVFALLS40 AV#40**

A solvent based cleaner used to clean water-based, UV and solvent based inks in an enclosed washer.

### **FCUVSOLV AV UV Solvent Cleaner**

Enclosed part washer that cleans water-based, UV and solvent based inks. to plates if any. Can also be used in a spray bottle to clean by hand or in a plate cleaner.

### **AVFMLFP AV Low Foaming Powder**

This product is powder soap to use in a washer for water-based ink.

## Sonic Cleaners

### AVFCULTRASONIC AV Ultra Sonic Cleaner

Used in any ultrasonic machine and can clean water-based, UV and solvent based inks. Lower PH due to not having any potassium or hydroxides. EPA exemption for a VOC free cleaner

### AVFCULTRASONIC 5 AV Ultra Sonic Cleaner

Used in any ultrasonic machine and can clean water-based, UV and solvent based inks. This highly alkaline anilox roll cleaner should not be used where soft metals are present.

## General Cleaners

### AVFCMagic General Shop Cleaner

A solvent based cleaner with a surfactant to clean water and UV inks. This will clean well due to having a higher PH and the surfactant helps lift off the ink and dirt. Can be used as a press side cleaner.

### AVAPFC AV All Purpose Cleaner

A solvent based cleaner to be used as a general purpose cleaner to clean water-based and UV inks without leaving a greasy residue.

## Neutralizing acids

### FCAN AV Cleaning Acid

An acid based cleaner used to help with stains in anilox rolls and bring PH down.

### Iso-Propyl Alcohol

ISOAL5 (5-gallon) or ISOAL55 (55-gallon) from Applied Chemistry is great for plate mounting and general cleaning surface prep.
